Jetscape New Facility Ground Breaking Ceremony

Fort Lauderdale, Florida: On January 25, 2019, Jetscape Services, South Florida's leading provider of business aviation services, celebrates its groundbreaking for a new 25,000-square-foot FBO terminal and two 40,000-square-foot hangars located at Fort Lauderdale/Hollywood International Airport (KFLA).

The location of this new facility will be on the West side of the airport, allowing for a more central location on the field, conveniently located just off the main runway. The new location will offer expanded ramp space and a closer proximity to the GA customs area.

"Over the last 16 years, we have outgrown our original leasehold. With the purchase of Victory Aviation's facility last year and this new 25-acre project, we will be able to accommodate all of Jetscape Services' customers", said Troy Menken, President of Jetscape Services.

"As a founding member of the Air Elite Network, Jetscape has always been committed to delivering service excellence. We applaud their investment in the new and expanded facility as it will provide the current and future Air Elite customers a very distinct and comfortable place to enjoy when they arrive in Fort Lauderdale," stated Steve Drzymalla, Senior Vice President, Bulk Fuel Sales North America.

To record this historical event, Jetscape team members were invited to participate in the ceremony along with individuals from FLL airport administration, vendors and customers. Attendees included Broward County Mayor Mark D. Bogen, Mark Gale Aviation Director/CEO, Airport Directors/Managers, and Broward County Commissioners.

About Jetscape Services
