Lubrication Management

At The Lubricant Company, we know how important a well maintained plant is to ensuring efficiency and profitability. That's why we have developed our Lubrication Management solution, offering customers tailored packages to suit their business needs.

Our Lubrication Management solutions are tailored to each individual customer and plant. Following a thorough audit of equipment and procedures, The Lubricant Company will develop a proactive action plan targeting equipment health, best practice in lubrication and lubricant management, and improvements in health and safety processes.

Our Lubrication Management solutions offer a wide range of services, from basic stock management, right through to on-site labour, so you can choose the elements that work for you.

What we Offer

- Single source of high quality lubricants
- Oil condition monitoring, with in-house interpretation and support
- Equipment diagnostics, including vibration analysis, thermal imaging and energy auditing
- Lubricant scheduling for specific equipment or whole plant
- Stock management
- Lubricant rationalisation
- Storage and handling solutions
- Tank telemetry and automated stock management
- On-site labour

Your dedicated Account Manager will talk you through the options and help you decide which are the most appropriate for your business. You will also have access to our highly experienced Field Engineering team and Energy Management team. For specific projects, we can access technical and engineering support from Mobil through their Field Engineering Services team.

Projects

The Lubricant Company will work with you to identify suffering points and issues. We will provide practical solutions, focusing on projects which improve equipment efficiency, reduce operating costs and drive profitability for your business, through minimising equipment failure, providing better reliability and looking at key production areas. With full access to our Field Engineering team and technical specialists, we can help improve your business efficiency, through our KPI driven solutions.

Benefits

Achieve best in class lubrication practices

- We have a proven track record in sites across the UK

Rationalise product range to fewest correct lubricants

- Fewer orders and deliveries, reduced risk of cross contamination and reduced storage requirements

Effective management of lubricant stock

- Ensure continuity of supply and reduce related admin costs

Significantly reduce admin related to ordering lubricants

- Lubrication Technicians will take full responsibility for stock management

Manage service performance through monthly KPI meetings

- Reporting on projects, product updates and cost savings
- KPIs developed with customer to align with their business reporting

Cost reduction projects

- Energy and environmental focus

Improved plant reliability

- Products proven to increase efficiency
- Tailored problem solving project approach

Reduced maintenance costs

- Reduced downtime
