## **World Fuel Services' New iPad App Will Integrate Aircraft Performance Group's iPreFlight™ Framework for Mobile Runway Analysis, Weight & Balance**

**October 6, 2017 – HOUSTON** – World Fuel Services (WFS) announced today that their new iPad app will seamlessly integrate Aircraft Performance Group's (APG) iPreflight™ framework. This integration will put flight planning, runway analysis, and weight & balance data together in one efficient, time-saving app.

"From the beginning, our mission with this app was to merge our flight planning design with the 'best of the best' in our industry and, as a result, maximize efficiency and accuracy," said Jeff Briand, vice president, global trip support for WFS. "APG is the ideal partner."

APG has been providing best-in-class takeoff, landing, and weight & balance products and services for airlines and corporate operators since 1999.

Their iPreFlight™ framework provides runway analysis and weight & balance data, without the need for an internet connection. The new WFS app will streamline the flight planning process so pilots can complete critical performance calculations, from anywhere. Pilots will also receive expert take-off and landing analyses – all so they can better adapt to changing flight conditions and requirements.

"Pilots will be able to access valuable runway analysis and weight & balance information right inside this one flight planning tool, making it possible to recalculate and update data without the need to switch from app to app," added Briand. "This integration will offer improved accuracy and safety for every flight plan."

## **About Aircraft Performance Group**

Aircraft Performance Group (APG) is a flight operations engineering firm, established in 1999. APG's primary products are takeoff, landing, flight planning, and weight and balance data services for the airline and corporate flight operations markets. APG provides services for hundreds of different aircraft types ranging from small turbo-prop aircraft for the regional airline market, narrow and wide-body aircraft for airlines, corporate turbo-prop aircraft, and wide-cabin ultra-long-haul business aircraft. APG maintains a current worldwide database of airport information and has experience in digitizing Aircraft Flight Manuals for use within our performance programs, as well as using aircraft manufacturer provided programs. APG has experience providing data services based on numerous regulatory requirements including FAA, EASA, CASA, Transport Canada, and others.

For more information about APG and its flight operations performance solutions, go to [www.flyapg.com](http://www.flyapg.com) or call +1 303-539-0410.

## **About World Fuel Services Corporation**

Headquartered in Miami, Florida, World Fuel Services is a global energy management company involved in providing energy procurement advisory services, supply fulfillment and transaction and payment management solutions to commercial and industrial customers, principally in the aviation, marine and land transportation industries. World Fuel Services sells fuel and delivers services to its clients at more than 8,000 locations in more than 200 countries and territories worldwide. For more information, call 305-428-8000 or visit [www.wfscorp.com](http://www.wfscorp.com).
