

Consider it **done**.

Today's "best price" for fuel may cost more than you think.

If you regularly buy fuel at daily low rack prices, you are speculating in the energy market. By betting prices will go down and stay down, you save money today, but what about tomorrow or the end of the year?

Price Risk Management for your business offers real advantages in any fuel price environment. A powerful procurement strategy, let our fuel market experts show you how a customized solution can help improve cash flow and offer greater control over your fuel budget spend.

It costs nothing to find out.

"I just like knowing the price of that fuel as it's coming on to my lot."

Our process is dynamic and collaborative

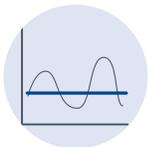

First, we work with you to determine the most effective price risk management or hedging strategy for your company's business, culture, risk profile and financial goals.

From there we execute the program, offering the kind of support, tools and guidance necessary for the success of your customized program ... at every step of the way.

Ask about our 5-point Price Risk Management Solution Worksheet

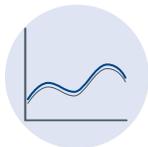

Tools include:

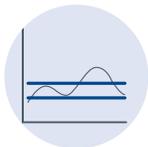

Fixed Price

Provides a known firm fixed price for a certain period of time tied to an exact quantity agreement.

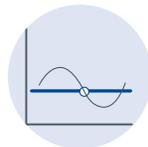

Market Index Pricing

Takes advantage of market conditions with guaranteed supply versus purchasing product on the open market. Contracts are available using a variety of indices (OPIS, NYMEX, Platts, Argus).

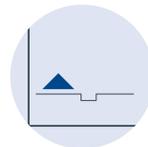

NYMEX triggers

Offers a fixed differential over the course of a delivery schedule with the option to place "limit" and/or "stop" orders for specified price targets.

Index Discount with Floor

(OPIS, NYMEX, Platts) - Floats with the market offering a discount on a contract index until a pre-determined floor price is reached (subject to market conditions and availability).

Price Caps (call options)

Provides a "cap" against rising fuel prices as well as benefits when fuel prices decline.

DOE Index

Protection from exposure to rising fuel surcharges by allowing for a fix or a cap on a freight provider's fuel surcharge.
